Custom Services

(custom products and services)

In today's world, providing the complete range of site equipment often involves a number of additional and essential services, apart from purely safety-related products.

The new CS3 «Custom Service» offer was designed to provide operators with effective support for their last-minute requirements.

The new CS3 offer includes the following products and logistics services:

- supply and installation of stretched canvas illuminated advertising boxes on the counter-jib,
- metal iodide high-intensity site lighting,
- enhancement and decoration of the crane structure with illuminated coloured garlands,
- daytime marking by medium-intensity lamp (20 000 candelas by day and 2 000 candelas by night),
- communication system using fixed and mobile walkie-talkies.

The AGS teams offer their proven know-how, control, skills and high reactivity, for all your specific installations on cranes and sites.

Custom services, upon request.
